DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

1. Claim 10 is rejected under 35 U.S.C. 102(a) as being anticipated by Anikitchev (US Patent 6,493,148).

Regarding claim 10, Anikitchev (figure 3) is interpreted as disclosing a laser light comprising a laser-bar-stack emitting longitudinal laser beam patterns, the longitudinal laser beam patterns being aligned along the stack direction, and means 31 and 32 for distributing of the longitudinal laser beam patterns into a stepwise pattern, and means 33 for closing up each of the stepwise patterns along the longitudinal direction.

Allowable Subject Matter

2. Claims 1-9 and 11-13 are allowed. The following is a statement of reasons for the indication of allowable subject matter. The present invention relates to a laser light source and an optical system for shaping light from a laser-bar-stack.

(a) Regarding claim 1, the prior art alone or in combination fails to disclose the novel configuration of the shaping optical system comprising a refracting optical system, a first and

Art Unit: 2873

second laser beam group wherein the second laser beam group being relatively shifted together with respect to the first laser beam group, and a transmission/reflecting optical system, which transmits and reflects the first and second laser beam groups so that the shifted laser beam groups align along the direction of layering.

(b) Regarding claims 11-13, the prior art alone or in combination fails to disclose an optical member comprises a glass plate having parallel surfaces, one of the surfaces having stripe reflection films thereon, and the other surface having a partial reflection film thereon so that the second laser beam group travels along the layering direction relative to the first laser beam group, thereby first and second laser beam groups are emitted from the remaining region of the other surface.

3. The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 USC 102 or 103 would be improper. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
